3-Acre Farm Zone Map

The one-page layout from our FW-3AC01 build: where the pond, beds, tunnel, orchard, pasture and barn go on 3 acres, with the acreage of every zone.

FW-3AC01 · 3-Acre Self-Sustaining Farm — Zone Map & Layout (plan view)

Fictional temperate-US concept plot (USDA zones ~6-7, ~40 in rain/yr). Dimensions in feet. Adapt to your survey, soils, slope and setbacks.

Zone schedule (computed from drawing)

Z0	Home + kitchen garden	0.35 ac 15,243 sf
Z1	Market garden (60 beds)	0.50 ac 21,775 sf
Z2	High tunnel 30x72 ft	0.05 ac 2,160 sf
Z3	Orchard / food forest on swales	0.45 ac 19,607 sf
Z4	Rotational pasture (4 paddocks)	1.00 ac 43,560 sf
Z5	Barn / feed store / compost / solar / tanks	0.20 ac 8,736 sf
Z6	Pond + overflow	0.15 ac 6,534 sf
Z7	Farm stand + parking	0.05 ac 2,178 sf
Z8	Lanes, yard, paths, hedgerow edges	0.25 ac 10,887 sf

Total 3.00 ac

Scale: drawn in feet. Rectangular concept plot.
Daily-visit zones (Z0, Z5, Z2) sit nearest the house & lane; pasture/orchard farther out (NC State Ext. permaculture zoning).
Water is placed first: swales on contour, pond at the low corner, tanks at the barn.
Locate well & septic before the house; setbacks are set by your county.

Family Table Farms · AI-assisted CONCEPT design for planning & education · NOT a stamped engineering or architectural drawing · check local codes/permits

Want the full plan?

The 3-Acre Self-Sustaining Farm Plan adds the barn and tunnel plans, paddock rotation, phased build order, off-grid sizing, a sourced cost table and an editable income worksheet:
yarosim.github.io/family-table-farms/plans

AI-assisted concept designs for planning and education. These are NOT stamped engineering or architectural drawings and are not certified as code-compliant. Soils, climate, loads, codes, zoning, setbacks, water rights and permits differ by place: check your local building department and consult a licensed professional (engineer, architect, electrician, well driller, septic designer) before you build. Cost figures are published ranges with dates, not quotes. Income figures are estimates scaled from public extension data, not promises.
